

Bracket for mounting the expansion tank

APPLICATION METHOD:

For wall mounting of the hydraulic accumulator or expansion tank of the heating system, water supply. For installation, the tank is screwed on one side, and the heating system outlet on the other side, thus the attachment for the expansion tank serves as an adapter. The bracket is fixed on the wall.

SPECIFICATION:

- material: steel;
- color: white;
- maximum permissible load on the bracket - 150 kg.
