

Clip for fastening MP and PEX pipes

APPLICATION METHOD:

It is used for fastening metal-plastic pipes, PEX pipes, as well as corrugated sleeves. The compression system of clips of the same or different diameters allows you to lay parallel pipelines as accurately as possible, observing the parallelism of the lines. The main advantage of the clip is its strength due to reinforced side ribs.

SPECIFICATION:

- material: plastic;
- color: white;

Art.	Name	Diameter, mm	Packaging, pcs
0101011101	Clip with dowel	16	1000
0101011102	Clip with dowel	20	1000
0101011103	Clip with dowel	26	500
0101011104	Clip with dowel	32	500
0101011105	Clip without dowel	16	1000
0101011106	Clip without dowel	20	1000
0101011107	Clip without dowel	26	500
0101011108	Clip without dowel	32	500

Clip for attaching polypropylene pipes

APPLICATION METHOD:

The clip is designed for reliable fixation of polypropylene pipes on the surface to avoid vibrations and deformations. They are installed in increments of more than 1 m to eliminate pipe deflections in the places of supports.

SPECIFICATION:

- material: polypropylene;
- color: gray;

Art.	Name	Diameter, mm	Packaging, pcs
0101010901	Clip PPR-premium	16	500
0101010902	Clip PPR-premium	20	500
0101010903	Clip PPR-premium	25	500
0101010904	Clip PPR-premium	32	500
0101011002	The PPR-Classic clip is single	20	1200
0101011001	The PPR-Classic clip is double	20	800
0101011005	The PPR-Classic clip is single	25	1200
0101011004	The PPR-Classic clip is double	25	700
0101011007	The PPR-Classic clip is single	32	600
