

Polymer sand hatches

Polymerized hatches are durable and reliable. The material from which they are made is resistant to the action of aggressive environments (oil, gasoline, acids, salt water), does not oxidize, perfectly withstands large temperature changes (from -35°C to +60°C). It is also possible to equip it with locking devices, which additionally protect against theft and unauthorized access to the sewer opening.

Art.	Name	Load, tons	Color	Diameter, mm	Weight, kg
8433	The hatch is round	Up to 1 τ	Green Red Black	750/625	10
7529	The hatch is square	Up to 1 τ	Green Red Black	size 750*750	15
7363	The hatch is round	Up to 4,5 τ	Green Red Black	750/625	28
5872	The hatch is round	Up to 12,5 τ	Green Red Black	750/670	33
7366	The hatch is round, difficult	Up to 25 τ	Green Red Black	750/670	45
7368	The hatch is round, difficult	Up to 40 τ	Green Red Black	750/670	80
