

Head for a well

APPLICATION METHOD:

The well head is intended for installation on the casing pipe for sealing the well, fastening the pump, pressure pipes and communication cables. The head is equipped with eye-bolts, which allow, if necessary, to easily mount it with the help of lifting equipment and a carabiner for fastening the pump.

SPECIFICATION:

- material: prepared rubber (hardness 40 - 45 units), polyurethane with special additives;
- hardware: high-strength steel, galvanized;
- permissible load on the product (suspended load) 220 kg.
