

## Installation strip for a warm floor

### APPLICATION METHOD:

The installation strip is an element for mounting the "Warm floor" system. A light, reliable design allows installation without a reinforced mesh.

The strip is made of specially prepared plastic, it is easy to install and can be attached to each other in grooves, the cells in the bar are provided for fixing PE-RT pipes with a diameter of 16/20 mm.

Art.	Name	Pipe diameter, mm	Length, mm	Packaging, pcs.
0101030202	Installation strip , black	16/20	500	50
0101030204	Installation strip , white	16/20	500	300
