

Underlay for a warm floor (with markings)

APPLICATION METHOD:

The underlay for a warm floor is a foil film with markings, which acts as a heat reflector. A reflective film for a warm floor is placed on the insulation under the heating pipes. Marking on the film facilitates the installation of heating pipes. It is supplied in rolls of 50 square meters, the film density can be 50 microns and 105 microns.

Art.	Name	Density, μ r	Packaging, sq.m.
0101030401	Film for a warm floor with markings	105	50
0101030402	Film for a warm floor with markings	50	50
